

Emmanouela Tsakalidou

tsakalidouemmanouela@gmail.com | github.com/EmmaTsak | emmatsak.github.io/portfolio

Software Development Graduate | Full-Stack, Python, C/C++ , APIs, Databases

EDUCATION

University of Essex Sep. 2024 – Jun. 2026
BSc (Hons) Computing (Software Development) – Overall Grade: 73%

IVT OMIROS Sep. 2023 – Jun. 2024
Web Designer/Developer – Video Games

EXPERIENCE

Software Developer Intern Feb. 2025 – Sep. 2025
Valmore Athens, Greece

- Developed, tested, and maintained application features within agile development cycles, contributing across implementation, debugging, validation, and release readiness.
- Created and executed Jest test scripts and investigated software defects using structured troubleshooting and root cause analysis.
- Built and optimized reusable React Native components while collaborating with developers and designers to deliver reliable application changes.

PROJECTS

PriceWise | TypeScript, React, Node.js, PostgreSQL, Prisma, Docker 2026 – Present

- Developing a full-stack grocery price comparison platform with automated data pipelines that collect, clean, validate, and store supermarket product data in PostgreSQL.
- Built RESTful APIs, structured product matching and filtering workflows, responsive React interfaces, multilingual support, and real-time price-update functionality.

Vinted Relisting Assistant | Python, PySide6, SQLAlchemy, SQLite, pytest 2026 – Present

- Developing a Windows desktop application in Python for local marketplace inventory management and structured relisting workflows.
- Implemented JSON/CSV imports, SQLite persistence, search, filtering, sorting, pagination, automated testing, and standalone Windows packaging.

C++ Sensor Dashboard | C++17, CMake, HTTP API, JavaScript, Chart.js 2026

- Developed a C++17 sensor monitoring application with a JSON HTTP API, simulated sensor processing, historical readings, and browser-based visualization.
- Applied multithreading, synchronization, smart pointers, RAII, STL containers and algorithms, configuration validation, and structured error handling.

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, Java, C, C++, C#, PHP, SQL

Development: React, React Native, Node.js, Express, RESTful APIs, PySide6, HTML/CSS

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Prisma, SQLAlchemy

Testing & Tools: Jest, pytest, Playwright, Postman, Git, GitHub, Docker, CMake, VS Code

Software Engineering: Agile Development, SDLC, Data Structures, Algorithms, Debugging, Multithreading, Technical Documentation

RELEVANT COURSEWORK

Advanced Programming; Advanced Databases; Operating Systems and Network Programming; Object-Oriented Programming; Mobile Programming; Software Engineering; Computer Networks and Security

LANGUAGES

English (Fluent) | Greek (Native)
